About Me

I design, I code, I bring ideas to life. Whether it's crafting seamless interfaces or cracking tricky problems, I love turning concepts into something real. I'm on the lookout for a place where I can build cool stuff, learn new things, and collaborate with awesome people.

Skills

- + JavaScript, REACT

+ Node.js, Express.js, APIs

+ PostgreSQL

+ UI/UX Design, Figma

+ HTML, CSS, SCSS, Bootstrap
- + AI tools, Git + GitHub

Work experience

2024 – FREELANCE WEB DEVELOPER

- + Built a full-stack web app using React, Node.js, and PostgreSQL, improving functionality and scalability.
- + Refactored and optimized legacy code, reducing API response time by up to 400ms.
- + Conducted user research and translated insights into a functional Figma design, enhancing website design and user experience.
- + Optimized website performance by compressing large media files, reducing load times by several seconds.

2019 – 2024 ROBINSONS BODYSHOP

- + Led team of 4 and did daily planning to achieve production goals in new business which resulted in stable daily production and reduced turnaround time by up to 40% which resulted in two company production records.
- + Solving production problems and setbacks which prevented up to two day delays and customer complaints.
- + Quality control of finished products to ensure customer satisfaction which has helped company to achieve 5 star rating on google reviews and strong reputations.

2015 – 2019 JOHN CLARK MOTOR GROUP

- + Supervising team of 5 and providing necessary training to new team members which helped company to become biggest service provider in Aberdeen area at that time.
- + Planning and prioritizing work deadlines
- + Work closely with management, provide updates of production process and update customers.
